

# CAPABILITY STATEMENT 2023

# COMPANY

PCR Polyweld is one of the leading suppliers of services to the mining and industrial sectors in Mackay, Rockhampton, The Bowen Basin and beyond. With more than 16 years in the industry, we offer a range of high-quality services across the sector, including the supply of poly-pipe and fittings, pump maintenance, steel fabrication, equipment and labour hire.

PCR Polyweld is also a Registered Training Organisation (RTO), offering many industry-recognised mining and industrial qualifications, delivered by experienced trainers who themselves have a wealth of industry knowledge. We also offer a wide range of mining and industrial plant and equipment for hire, including vehicles, excavators, sea containers and much more.

Sites serviced in the Bowen Basin include:

Oaky Creek Coal	Goonyella /Riverside
Kestrel Coal	Burton Downs
Gregory Coal Mine	German Creek
Millennium CHPP	Moranbah North
Coppabella CHPP	Saraji BMA
Blackwater BMA CHPP/Field work	Collinsville Coal

Further a field PCR Polyweld has also supplied & continues to supply polywelding and construction teams to projects in the Northern Territory, Western Australia and Papua New Guinea.

# HEALTH & SAFETY

It is part of PCR Polyweld's corporate policy to establish and maintain the highest possible standards of Occupational Health, Safety and Environmental Management throughout its operations worldwide.

Safety of people must be an important objective in all operations that PCR Polyweld teams undertake.

PCR Polyweld's Workplace Health, Safety & Environmental Management Policy provides a detailed guide to all employees to ensure that any company activity does not jeopardise the health, safety or general well being of any employee, subcontractor, visitor, or anyone affected by the company's operations and the environment in general.

Typically projects and operations are governed by project and site specific H&S Management Plans customised to local conditions and legislative requirements. In these cases PCR Polyweld's employees have a solid track recording of abiding by the site requirements.

All projects carried out by PCR are subject to a detailed risk analysis and a comprehensive safe work procedure is developed for every major activity. These procedures detail measures to be taken to ensure that all employees have been made aware of the risks associated with a task and have put in place the necessary risk control measures designed to mitigate or eliminate the associated risks.

The PCR Polyweld team consists of Workplace Health & Safety Officers, Workplace Injury Management Advisor/ Return to work coordinator, and an Health Safety Environment and Risk Specialist/ consultant.

# SERVICES

# SERVICES

## Field Services / Labour Hire

PCR Polyweld offer a wide range of services to the mining and industrial sectors and have supplied these services in many locations, including Mackay, Rockhampton, the Bowen Basin, Western Australia, Groote Eylandt and Papua New Guinea.

Originally founded in 2006, the company still provides the professional services that the company was built upon. These included the supply and installation of large diameter poly pipe to construction projects. We also continue to supply polywelding and construction teams to projects across our serviced locations, and Gas Drainage installation & support to multiple clients in the Bowen Basin. PCR Polyweld also offer CHPP maintenance, chute lining/ industrial tiling and sandblasting.

PCR Polyweld consistently maintains a strong workforce. Employees are long term whom have both a trade qualified background and a wealth of experience in maintenance and construction.

PCR Polyweld can take care of your pipeline or construction project, from design through to commissioning. We can also develop specific ITP / QA documentation specific to your project.
